

Open Source CAD Software Workshop

A number of different machines in ZAM need digital models as input such as the FDM (3D printer) machines and any C&C milling machine. Therefore, there is a demand on knowledge about creating digital models. These can be conveniently created using CAD software. A number of Open Source solutions exists. Two examples are:

<https://www.freecad.org/>

<https://openscad.org/>

The purpose of this workshop is to give a basic introduction in the usage in one or more such systems.
